**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a inner city residential consumer (San Francisco Potrero Hill neighborhood), and I've been a customer of Sonic's fiber to the home for over 6 months. I've enjoyed their reliable service, excellent customer service, and blazing fast download speeds.

For personal purposes, my household has come to enjoy Sonic's unlimited bandwidth, as we have around 5 different screens which can simultaneously be streaming video at once.

For professional purposes, Sonic has been indispensable. I work from home 2 days per week, and with Sonic I can reliably access my employer's network without concern about a slow or latent connection. Best of all, with Sonic, I can remain reliably connected to work while my girlfriend streams videos without it impacting my connection. With our previous provider, if she streamed video, my work VPN connection would come to a near halt.

Best of all, Sonic's pricing is predictable. One fixed monthly payment for unlimited bandwidth. Period. With our previous provider the payment bounced between \$60-\$90 / month. With Sonic, it's fixed at \$50 + tax.

In short, I've come to rely on Sonic's fibre-to-the-home both for earning my living as well as for personal enjoyment at home. I and my household will be materially affected, in a negative way, if the FCC bans UNE-based services from Sonic.

Thanks!
